Fussy about your Hot Buttered Popcorn?

This Butter-Ring Popper gives you the delicious, evenly-buttered corn that pleases popcorn perfectionists

With most ordinary poppers, you can't spread the butter until the corn's all popped. That can mean too much butter on top and maybe none on the bottom. But our Butter-Ring Popper starts melting and spreading butter automatically almost from the first kernel on, and keeps on until the last. That means deliciously buttered corn in each and every handful.

Operation. Citizens Band 2 way radios (transceivers) are designed to provide instant communications from almost any location. No special skill or technical knowledge is needed. DC powered mobile units may be used in any outdoor vehicle with appropriate battery system.

License. You must obtain an FCC license to operate CB equipment. You must be over 18 years of age and (subject to change) pay a $4 fee. No exam required. License good for 5 years and renewable. A dealer can apply for more than one unit, permits units to be operated by owner or employees or immediate family. All our CB radios are FCC-type accepted and include license application.

Channel Capacity. There are 23 channels available for use by CB operators. Some channels are restricted by the FCC for use between operators on the same license. Channel 9 is reserved for emergency communications only.

Most bikes get parked at the curb. They just can't stand up to the bumps and bangs that come on when the pavement leaves off. Not this motocross bike. It lets you keep the fun and excitement hot even cross-country or on a punishing dirt track.

To help you handle the jolts, thumps and jangles there's a cycle-style saddle. Deeply padded. Stitched-down vinyl cover. And it's suspended between seat post and support bar to help absorb shocks. Handlebar has padded crossbar, deep-cushioned grips.

In the pattern of a fine dirt bike, this one stands up to ruts and rocks using heavy-duty steel frame with braced front fork, wide 20x2.125-inch knobby tires for deep-biting traction, 36 heavy-duty spokes per wheel, double-wall rims front and rear and wide flange front hub. Satin black finish. [redacted]

Like everything else in Sears books, it's so easy to order by telephone.

Mineral/Metal Detectors with waterproof search coils and solid-state circuitry

Two types—BFO (beat frequency oscillator) or TR (transmitter/receiver).

BFO-type Detectors have simpler design and lighter weight. Variations in sound pitch tell you when object is located. **TR-type Detectors** are more sophisticated so you can get a better "feel" for what's beneath you. They can be tuned to silent running without losing sensitivity. They tend to drift less.
